I Lori S. Mangrum, as the designated Quality Assurance Officer, hereby attest that all electronic deliverables have been thoroughly reviewed and are in agreement with the associated hardcopy data. The enclosed electronic files have been reviewed for accuracy (including significant figures), completeness and format. The laboratory will be responsible for any labor time necessary to correct enclosed electronic deliverables that have been found to be in error. I can be reached at (407) 826-5314 if there are any questions or problems with the enclosed electronic deliverables.

RE: Laboratory Results for
Project Number: 112G08982, Project Name/Desc: NASA KSC HMFN SWMU 090
ENCO Workorder(s): AE01113

Dear Chris Hook,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Thursday, February 11, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

ENCO Project ID: AE01113
SDG: AE01113-TE015

Overview

All samples submitted were analyzed by Environmental Conservation Laboratories, Inc. in accordance with the methods referenced in the laboratory report. Any particular difficulties encountered during sample handling and processing will be discussed in the Remarks section below.

Remarks

List of instruments used:

Analytical and Preparation Method	SOP Reference Instrument
TO-15	OVGCMS7

Analysis: TO-15

The calibration curve and the continuing calibration standards are in ppbv. Raw data is reported in pptv. Per request, results may be reported in a unit other than ppbv which is obtained through a conversion factor set up in the laboratories' database.

Manual integrations were performed on samples associated with TO-15. All data & explanations are included in the raw data section of the report.

Methylene chloride is a common laboratory contaminant.

Affected Samples: AA64997-CCV1, HMPN-VMP02-PLOT-20210210[AE01113-01], HMPN-VMP01-FIELD-20210210[AE01113-02]
The continuing calibration verification standard exhibited low bias for 1,2,4-trichlorobenzene; the associated sample had ND (non-detect) results, but sensitivity was verified by analyzing a standard with a concentration equivalent to the reporting limit.

Affected Samples: 1B17031-BS1, 1B17031-BSD1, HMPN-VMP02-PLOT-20210210[AE01113-01], HMPN-VMP01-FIELD-20210210[AE01113-02]
The associated laboratory control sample exhibited low bias for 1,2-dichloroethane; the associated sample had ND (non-detect) results, but sensitivity was verified by analyzing a standard with a concentration equivalent to the reporting limit.

Affected Samples: 1B17031-BLK1, HMPN-VMP02-PLOT-20210210[AE01113-01], HMPN-VMP01-FIELD-20210210[AE01113-02]
Result for methylene chloride may be biased high due to positive results in the method blank.

Affected Samples: AA64317-SCV1
Recovery for trans-1,3-dichloropropene and 1,2,4-trichlorobenzene was outside acceptance limits. Analytes were not detected in the samples.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy package and in computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures.

Kaitlin Dylnicki
Project Manager

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
A-07	Analyte biased low in LCS but detected in the reporting limit standard. Since the analyte in the associated sample was not detected, there is no impact on data quality.
J-01	Result may be biased high due to positive results in the associated method blank at a concentration above the MDL and/or greater than one-half the MRL.
J-05	Result may be biased low. Associated calibration verification standard did not meet the minimum control limit.
J-06	The associated laboratory control sample exhibited low bias; the reported result should be considered to be a minimum estimate.
O-01	This compound is a common laboratory contaminant.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

B	The analyte was detected in the associated method blank.
D	The sample was analyzed at dilution.
J	The reported result is an estimated value.
U	The analyte was analyzed for but not detected to the level shown, adjusted for actual sample preparation data and moisture content, where applicable.
E	The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence (85% or greater confidence) to make a “tentative identification".
Q	One or more quality control criteria failed.

This is an automated notification from our laboratory information management system (LIMS), indicating the samples we have recently received and their associated analyses. Should any of the following information be in error, please contact us immediately.

Thank you for choosing Environmental Conservation Laboratories. Should any events occur that delay the processing of your samples or inhibit our ability to complete the project within the projected time frame you will be contacted.

Sincerely,

Kaitlin Dylnicki

I Lori S. Mangrum, as the designated Quality Assurance Officer, hereby attest that all electronic deliverables have been thoroughly reviewed and are in agreement with the associated hardcopy data. The enclosed electronic files have been reviewed for accuracy (including significant figures), completeness and format. The laboratory will be responsible for any labor time necessary to correct enclosed electronic deliverables that have been found to be in error. I can be reached at (407) 826-5314 if there are any questions or problems with the enclosed electronic deliverables.

RE: Laboratory Results for
Project Number: 112G08982, Project Name/Desc: NASA KSC HMFN SWMU 090
ENCO Workorder(s): AE02773

Dear Chris Hook,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Tuesday, April 27, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

Overview

All samples submitted were analyzed by Environmental Conservation Laboratories, Inc. in accordance with the methods referenced in the laboratory report. Any particular difficulties encountered during sample handling and processing will be discussed in the Remarks section below.

Remarks

List of instruments used:

Analytical and Preparation Method	SOP Reference Instrument
TO-15	OVGCMS7

Analysis: TO-15

The calibration curve and the continuing calibration standards are in ppbv. Raw data is reported in pptv. Per request, results may be reported in a unit other than ppbv which is obtained through a conversion factor set up in the laboratories' database.

Manual integrations were performed on samples associated with TO-15. All data & explanations are included in the raw data section of the report.

Affected Samples: AA65685-SCV1
Recovery for trans-1,3-dichloropropene was outside acceptance limits. Analytes was not detected in the samples.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy package and in computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures.

Kaitlin Dylnicki
Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

B	The analyte was detected in the associated method blank.
D	The sample was analyzed at dilution.
J	The reported result is an estimated value.
U	The analyte was analyzed for but not detected to the level shown, adjusted for actual sample preparation data and moisture content, where applicable.
E	The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence (85% or greater confidence) to make a “tentative identification".
Q	One or more quality control criteria failed.

This is an automated notification from our laboratory information management system (LIMS), indicating the samples we have recently received and their associated analyses. Should any of the following information be in error, please contact us immediately.

Thank you for choosing Environmental Conservation Laboratories. Should any events occur that delay the processing of your samples or inhibit our ability to complete the project within the projected time frame you will be contacted.

Sincerely,

Kaitlin Dylnicki

RE: Laboratory Results for
Project Number: 112G08982, Project Name/Desc: NASA KSC HMFN SWMU 090
ENCO Workorder(s): AE06075

Dear Chris Hook,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Tuesday, July 27, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
QB-02	The method blank contains analyte at a concentration above the MDL and/or greater than one-half the MRL. The analyte was not detected in the sample.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

COMPENDIUM METHOD TO-14A/COMPENDIUM METHOD TO-15 CANISTER SAMPLING FIELD TEST DATA SHEET

General Sampling Information should be recorded for each SUMMA canister used to collect samples.

General Information

SITE LOCATION:	NASA KSC
SITE ADDRESS:	HMFN
SAMPLER ID:	HMFN - VMP1 - FIELD - 20210726
SAMPLING DATE:	26 JUL 21
OPERATOR:	DAN FOSTER
SHIPPING DATE:	
CANISTER SERIAL NO.:	35-078
CANISTER LEAK CHECK DATE:	Laboratory information on file.
REGULATOR SERIAL NO.:	6667

Sampling Information

	Temperature	Canister Pressure	Local Time	Regulator Flow Rate
START	80	-30 in Hg	0745	5 L/M
STOP	90	-4 in Hg	1515

RE: Laboratory Results for
Project Number: 112G08982, Project Name/Desc: NASA KSC HMFN
ENCO Workorder(s): AD03465

Dear Chris Hook,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Friday, June 5, 2020.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

PROJECT NARRATIVE

Client: Tetra Tech NUS, Inc. (TE015)
Project: NASA KSC HMFN
ENCO Project ID: AD03465

Overview

All samples submitted were analyzed by Environmental Conservation Laboratories, Inc. in accordance with the methods referenced in the laboratory report. Any particular difficulties encountered during sample handling and processing will be discussed in the Remarks section below.

Remarks

Analysis: EPA 8260D

This report is an amendment to the original report dated 06/17/2020 for this work order to update the client project manager and office address.

Kaitlin Dylnicki
Project Manager

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
A-07	Analyte biased low in LCS but detected in the reporting limit standard. Since the analyte in the associated sample was not detected, there is no impact on data quality.
QB-02	The method blank contains analyte at a concentration above the MDL and/or greater than one-half the MRL. The analyte was not detected in the sample.
QL-02	The associated laboratory control sample exhibited high bias; since the result is ND, there is no impact.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-11	Precision between duplicate matrix spikes of the same sample was outside acceptance limits.
QM-19	The spike recovery was outside acceptance limits for the MS and/or MSD.
QV-01	The associated continuing calibration verification standard exhibited high bias; since the result is ND, there is no impact.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

RE: Laboratory Results for
Project Number: 112G08982, Project Name/Desc: NASA KSC HMFN
ENCO Workorder(s): AD07357

Dear Chris Hook,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Friday, October 30, 2020.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

Toluene-d8	*52*			*ug/L*	*50.0*		*105*	*41-146*			

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
A-07	Analyte biased low in LCS but detected in the reporting limit standard. Since the analyte in the associated sample was not detected, there is no impact on data quality.
QL-02	The associated laboratory control sample exhibited high bias; since the result is ND, there is no impact.
QM-11	Precision between duplicate matrix spikes of the same sample was outside acceptance limits.
QM-19	The spike recovery was outside acceptance limits for the MS and/or MSD.
QV-01	The associated continuing calibration verification standard exhibited high bias; since the result is ND, there is no impact.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

RE: Laboratory Results for
Project Number: 112G08982, Project Name/Desc: NASA KSC HMFN
ENCO Workorder(s): AD06931

Dear Chris Hook,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Wednesday, October 28, 2020.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
QL-02	The associated laboratory control sample exhibited high bias; since the result is ND, there is no impact.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-11	Precision between duplicate matrix spikes of the same sample was outside acceptance limits.
QM-19	The spike recovery was outside acceptance limits for the MS and/or MSD.
QV-01	The associated continuing calibration verification standard exhibited high bias; since the result is ND, there is no impact.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

RE: Laboratory Results for
Project Number: 112G08982, Project Name/Desc: NASA KSC HMFN SWMU 090
ENCO Workorder(s): AE00180

Dear Chris Hook,

Enclosed is a copy of your laboratory report for test samples received by our laboratory on Monday, February 1, 2021.

Unless otherwise noted in an attached project narrative, all samples were received in acceptable condition and processed in accordance with the referenced methods/procedures. Results for these procedures apply only to the samples as submitted.

The analytical results contained in this report are in compliance with NELAC standards, except as noted in the project narrative if applicable. This report shall not be reproduced except in full, without the written approval of the Laboratory.

This report contains only those analyses performed by Environmental Conservation Laboratories. Unless otherwise noted, all analyses were performed at ENCO Orlando. Data from outside organizations will be reported under separate cover.

If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

Kaitlin Dylnicki

Project Manager

Overview

All samples submitted were analyzed by Environmental Conservation Laboratories, Inc. in accordance with the methods referenced in the laboratory report. Any particular difficulties encountered during sample handling and processing will be discussed in the Remarks section below.

Remarks

This package includes an amendment to the Level II report dated 2/8/21 to include surrogate results for HMPN-MW0041-035.0-20210128[AE00180-03] and HMPN-MW0002-035.0-20210201[AE00180-28] that were not initially included.

List of instruments used:

Analytical and Preparation Method	SOP Reference Instrument
EPA 8260D / 5030B_MS	OVGCMS2, OVGCMS5

Analysis: EPA 8260D

Manual integrations were performed on samples associated with EPA 8260D. All data & explanations are included in the raw data section of the report.

Affected Samples: AA64811-CCV1, HMPN-MW0043-035.0-20210128[AE00180-01], HMPN-MW0044-045.0-20210128[AE00180-02], HMPN-MW0042-042.5-20210128[AE00180-04], HMPN-MW0046-015.0-20210129[AE00180-07], HMPN-MW0047-025.0-20210129[AE00180-08], HMPN-MW0036-015.0-20210129[AE00180-09], HMPN-MW0011-025.0-20210129[AE00180-10], HMPN-MW0029-015.0-20210129[AE00180-11], HMPN-MW0030-025.0-20210129[AE00180-12], HMPN-MW0031-035.0-20210129[AE00180-13], HMPN-MW0032-042.5-20210129[AE00180-14], HMPN-MW0008-025.0-20210129[AE00180-16]
The associated calibration verification standard for isopropylbenzene, styrene, and xylenes (total) exhibited high bias. Analyte(s) not detected in the sample.

Affected Samples: 1B04020-BS1, 1B04041-BS1, 1B05029-BS1, 1B05029-BSD1, HMPN-MW0043-035.0-20210128[AE00180-01], HMPN-MW0044-045.0-20210128[AE00180-02], HMPN-MW0042-042.5-20210128[AE00180-04], HMPN-MW0037-010.0-20210129[AE00180-05], HMPN-MW0038-020.0-20210129[AE00180-06], HMPN-MW0046-015.0-20210129[AE00180-07], HMPN-MW0047-025.0-20210129[AE00180-08], HMPN-MW0036-015.0-20210129[AE00180-09], HMPN-MW0011-025.0-20210129[AE00180-10], HMPN-MW0029-015.0-20210129[AE00180-11], HMPN-MW0030-025.0-20210129[AE00180-12], HMPN-MW0031-035.0-20210129[AE00180-13], HMPN-MW0032-042.5-20210129[AE00180-14], HMPN-MW0008-025.0-20210129[AE00180-16], HMPN-MW0024-060.0-20210129[AE00180-17], HMPN-MW0035-035.0-20210129[AE00180-18], HMPN-MW0034-015.0-20210129[AE00180-19], HMPN-MW0039-035.0-20210131[AE00180-20], HMPN-MW0040-042.5-20210131[AE00180-21], HMPN-MW0009-010.0-20210131[AE00180-22], HMPN-MW0004-010.0-20210131[AE00180-23], HMPN-MW0027-042.5-20210201[AE00180-24], HMPN-MW0028-047.5-20210201[AE00180-25], HMPN-DRUM222803-20210201[AE00180-29]
The laboratory control sample exhibited low bias for methyl acetate; the associated sample had ND (non-detect) results, but sensitivity was verified by analyzing a standard with a concentration equivalent to the reporting limit.

Affected Samples: HMPN-MW0043-035.0-20210128[AE00180-01], 1B04020-MS1, 1B04020-MSD1
Matrix spike recovery was outside acceptance limits for methyl acetate.

Affected Samples: HMPN-MW0044-045.0-20210128[AE00180-02], HMPN-MW0041-035.0-20210128[AE00180-03], HMPN-MW0042-042.5-20210128[AE00180-04], HMPN-MW0030-025.0-20210129[AE00180-12], HMPN-MW0031-035.0-20210129[AE00180-13], HMPN-MW0032-042.5-20210129[AE00180-14], HMPN-MW0033-047.5-20210129[AE00180-15], HMPN-MW0039-035.0-20210131[AE00180-20], HMPN-MW0039-035.0-20210131[AE00180-20RE1], HMPN-MW0009-010.0-20210131[AE00180-22], HMPN-MW0027-042.5-20210201[AE00180-24], HMPN-MW0028-047.5-20210201[AE00180-25], HMPN-MW0016-010.0-20210201[AE00180-26], HMPN-MW0045-030.0-20210201[AE00180-27], HMPN-MW0002-035.0-20210201[AE00180-28], HMPN-DRUM222803-20210201[AE00180-29], HMPN-DRUM222803-20210201[AE00180-29RE1]
Sample was analyzed at a dilution due to suspected matrix interference.

Affected Samples: HMPN-MW0041-035.0-20210128[AE00180-03], HMPN-MW0033-047.5-20210129[AE00180-15], HMPN-MW0016-010.0-20210201[AE00180-26], HMPN-MW0045-030.0-20210201[AE00180-27], HMPN-MW0002-035.0-20210201[AE00180-28]
Initial analysis was over diluted. Sample was reanalyzed at a lower dilution.

Affected Samples: HMPN-MW0041-035.0-20210128[AE00180-03RE1]
Result for cis-1,2-dichloroethene was over the calibration range of the instrument. Initial result was within the calibration range.

Affected Samples: AA64821-CCV1, AA64833-CCV1, HMPN-MW0041-035.0-20210128[AE00180-03], HMPN-MW0033-047.5-20210129[AE00180-15RE1], HMPN-MW0024-060.0-20210129[AE00180-17], HMPN-MW0035-035.0-20210129[AE00180-18], HMPN-MW0034-015.0-20210129[AE00180-19], HMPN-MW0039-035.0-20210131[AE00180-20], HMPN-MW0040-042.5-20210131[AE00180-21], HMPN-MW0009-010.0-20210131[AE00180-22], HMPN-MW0004-010.0-20210131[AE00180-23], HMPN-MW0027-042.5-20210201[AE00180-24], HMPN-MW0028-047.5-20210201[AE00180-25], HMPN-MW0016-010.0-20210201[AE00180-26RE1], HMPN-MW0045-030.0-20210201[AE00180-27RE1], HMPN-MW0002-035.0-20210201[AE00180-28RE1], HMPN-DRUM222803-20210201[AE00180-29]
The associated calibration verification standard for bromomethane exhibited high bias. Analyte(s) not detected in the sample.

Affected Samples: AA64811-CCV1, HMPN-MW0037-010.0-20210129[AE00180-05], HMPN-MW0038-020.0-20210129[AE00180-06]
The associated calibration verification standard for isopropylbenzene and styrene exhibited high bias. Analyte(s) not detected in the sample.

Affected Samples: AA64811-CCV1, HMPN-MW0037-010.0-20210129[AE00180-05], HMPN-MW0038-020.0-20210129[AE00180-06]
The associated calibration verification standard for xylenes (o-xylene) exhibited high bias. Sample was reanalyzed with acceptable QC recoveries.

Affected Samples: AA64821-CCV1, HMPN-MW0035-035.0-20210129[AE00180-18], HMPN-MW0034-015.0-20210129[AE00180-19], HMPN-MW0039-035.0-20210131[AE00180-20], HMPN-MW0040-042.5-20210131[AE00180-21], HMPN-MW0009-010.0-20210131[AE00180-22], HMPN-DRUM222803-20210201[AE00180-29]
The associated calibration verification standard for vinyl chloride was outside acceptance limits. Sample was reanalyzed with acceptable QC recoveries.

Affected Samples: HMPN-MW0035-035.0-20210129[AE00180-18], HMPN-MW0035-035.0-20210129[AE00180-18RE1]
Result for cis-1,2-dichloroethene was above the calibration range of the instrument. Sample was reanalyzed at a dilution.

Affected Samples: HMPN-MW0027-042.5-20210201[AE00180-24]
Result for trichloroethene was above the calibration range of the instrument. Sample was reanalyzed at a dilution.

Affected Samples: HMPN-MW0028-047.5-20210201[AE00180-25]
Result for Freon 113 and trichloroethene was above the calibration range of the instrument. Sample was reanalyzed at a dilution.

Affected Samples: 1B04020-MS1, 1B04020-MSD1
Result for cis-1,2-dichloroethane is over the calibration range of the instrument. Spike recovery was acceptable. Source sample was reanalyzed at a dilution.

Affected Samples: 1B04041-MS1, 1B04041-MSD1
Precision between duplicate matrix spikes of the same sample was outside acceptance limits for bromomethane and methyl acetate.

Affected Samples: 1B04041-MS1, 1B04041-MSD1
Matrix spike recovery for cyclohexane and/or methyl acetate was outside acceptance limits.

Affected Batch: 1B05029
Laboratory sample duplicate was analyzed in place of matrix spike and matrix spike duplicate.

Affected Samples: AA64811-CCV1, AA64821-CCV1, AA64821-CCV2, AA64837-CCV1
The continuing calibration verification standard exhibited low bias for multiple analytes; the associated sample had ND (non-detect) results, but sensitivity was verified by analyzing a standard with a concentration equivalent to the reporting limit.

Affected Sequence: AA64808
SCV recovery for 2-butanone was outside acceptance limits. Analyte was not detected in the samples.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy package and in computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signatures.

Kaitlin Dylnicki

Toluene-d8	*48*	*I*		*ug/L*	*50.0*		*96*	*41-146*			*QM-10*

FLAGS/NOTES AND DEFINITIONS

PQL	PQL: Practical Quantitation Limit. The PQL presented is the laboratory MRL.
B	Results are based upon membrane filter colony counts that are outside the method indicated ideal range.
I	The reported value is between the laboratory method detection limit (MDL) and the practical quantitation limit (PQL).
J	Estimated value.
K	Off-scale low; Actual value is known to be less than the value given.
L	Off-scale high; Actual value is known to be greater than value given.
M	Presence of analyte is verified but not quantified; the actual value is less than the MRL but greater than the MDL.
N	Presumptive evidence of presence of material.
O	Sampled, but analysis lost or not performed.
Q	Sample exceeded the accepted holding time.
T	Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
U	Indicates that the compound was analyzed for but not detected.
V	Indicates that the analyte was detected in both the sample and the associated method blank.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
Z	Too many colonies were present (TNTC); the numeric value represents the filtration volume.
?	Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
*****	Not reported due to interference.
[CALC]	Calculated analyte - MDL/MRL reported to the highest reporting limit of the component analyses.
A-07	Analyte biased low in LCS but detected in the reporting limit standard. Since the analyte in the associated sample was not detected, there is no impact on data quality.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-10	LCS/LCSD were analyzed in place of MS/MSD.
QM-11	Precision between duplicate matrix spikes of the same sample was outside acceptance limits.
QM-19	The spike recovery was outside acceptance limits for the MS and/or MSD.
QV-01	The associated continuing calibration verification standard exhibited high bias; since the result is ND, there is no impact.

This report relates only to the sample as received by the laboratory, and may only be reproduced in full.

B	The analyte was detected in the associated method blank.
D	The sample was analyzed at dilution.
J	The reported result is an estimated value.
U	The analyte was analyzed for but not detected to the level shown, adjusted for actual sample preparation data and moisture content, where applicable.
E	The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence (85% or greater confidence) to make a “tentative identification".
Q	One or more quality control criteria failed.

(1) Before solvent extraction proceeds, verify that there is no residual chlorine above 0.5 mg/L. Any sample above this must be treated to remove excess chlorine before extraction, and this documented as a comment.

Instrument 5
EST Centurian autosampler manufacturer reccommends adding 5 uL of IS/SS.

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☒ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

(1) Before solvent extraction proceeds, verify that there is no residual chlorine above 0.5 mg/L. Any sample above this must be treated to remove excess chlorine before extraction, and this documented as a comment.

Instrument 5
EST Centurian autosampler manufacturer reccommends adding 5 uL of IS/SS.

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☒ ~~Orlando~~

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

Instrument ID:	OVGCMS-5

(1) Before solvent extraction proceeds, verify that there is no residual chlorine above 0.5 mg/L. Any sample above this must be treated to remove excess chlorine before extraction, and this documented as a comment.

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☒ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☒ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

Instrument ID:	OVGCMS-5
Sequence/Batch ID:	AA63053

Review:
[X] Manual Integration [ ] Manual Integration
Reason for manual integration:
[X] Poor integration (peak tailing, baseline selection)
[ ] Incorrect peak selection/Peak not found
[ ] Hump integration
[ ] Baseline drop for split peaks
[ ] ISTD reintegration
[ ] Other:

Manual Integration Review Form

ENVIRONMENTAL CONSERVATION LABORATORIES, INC. ☐ Cary ☐ Jacksonville ☑ Orlando

I hereby attest that the manual integrations contained in this package have been thoroughly reviewed and are in agreement with the associated hardcopy data.

The electronic files listed below have been reviewed for accuracy, completeness and comply with ENCO labs QA-11 Manual Integration Policy including:

- "Before" and "After" chromatograms are provided
- Manual integrations are indicated on expanded scale "after" chromatograms at a scale large enough to see the manual integration performed.
- Reintegration technique marked if available on the data system
- Technical justification for manual integration
- Appropriate flags indicating which analytes were manually integrated are included in the raw data
- Analyst's initials and date.

Instrument ID:	OVGCMS2
Sequence/Batch ID:	AA64808
Data File Prefix:	212B
Date and Time Range of MIs:	2/4/21 - 2/5/21 2/4/21 8:38-12:22 2/5/21 9:39-9:40

Spiked Amount 50.000	Range 41 - 142		Recovery = 156.82%#			
Target Compounds						Qvalue
2) Dichlorodifluoromethane	5.91	85	545458	101.40	ug/kg	99
3) Chloromethane	6.37	50	595924	111.36	ug/kg	98
4) Vinyl Chloride	6.57	62	485882	107.18	ug/kg	98
5) Bromomethane	7.21	96	143033	50.00	ug/kg	98
6) Chloroethane	7.45	64	228629	78.19	ug/kg	96
7) Trichlorofluoromethane	7.71	101	501272	66.76	ug/kg	98
8) Trichlorotrifluoroethane	8.54	101	291087	115.09	ug/kg	92
9) acrolein	8.89	56	464280	1354.88	ug/kg	97
10) Acetone	9.25	43	284552	509.05	ug/kg	89
11) 1,1-Dichloroethene	8.50	96	278243	110.38	ug/kg	99
12) 3-Chloropropene	9.09	76	194160	143.73	ug/kg	61
13) Acetonitrile	9.78	41	279660	1210.78	ug/kg	99
14) Iodomethane	8.73	142	1886675	613.78	ug/kg	89
15) Carbon disulfide	8.62	76	5025357	804.64	ug/kg	100
16) Methylene Chloride	9.21	84	311768	118.80	ug/kg	87
17) Methyl tert-butyl ether	9.52	73	699414	124.26	ug/kg	92
18) Acrylonitrile	10.11	53	1338538	1099.78	ug/kg	98
19) T-1,2-Dichloroethene	9.44	96	312966	115.54	ug/kg	95
20) Isopropyl Ether	9.90	45	1428504	94.64	ug/kg	94
21) C-1,2-Dichloroethene	10.67	96	346706	108.29	ug/kg	96
22) 1,1-Dichloroethane	10.12	63	611726	102.74	ug/kg	99
23) Vinyl Acetate	10.30	43	3547967	428.22	ug/kg	97
24) Chloroprene	10.10	88	283721	120.34	ug/kg	86
25) 2-Butanone	11.17	72	99413	623.05	ug/kg	57
26) Propionitrile	11.45	54	272111	1188.72	ug/kg	100
27) 2,2-Dichloropropane	10.81	77	473824	116.64	ug/kg	99
28) Methacrylonitrile	11.48	67	875140	1148.09	ug/kg	72
29) Chloroform	10.89	83	580199	117.85	ug/kg	95
31) Dibromofluoromethane	11.08	113	217259	73.42	ug/kg	100
32) Bromochloromethane	10.87	128	166060	105.38	ug/kg	93
33) 1,1,1-Trichloroethane	11.19	97	435549	91.68	ug/kg	99
34) 1,1-Dichloropropene	11.29	75	451754	112.74	ug/kg	96
35) Diethyl Ether	8.14	59	257260	126.34	ug/kg	88
36) Methyl Acetate	9.39	74	36024	143.94	ug/kg#	53
37) Cyclohexane	10.96	56	528652	107.02	ug/kg	96
39) Methyl Cyclohexane	12.08	55	397206	105.51	ug/kg	98
40) Carbon Tetrachloride	11.15	117	450923	93.78	ug/kg	99
41) 1,2-Dichloroethane	11.67	62	405457	107.27	ug/kg	99
42) Benzene	11.53	78	1138771	101.42	ug/kg	98
43) Isobutyl Alcohol	11.55	43	399981	2139.49	ug/kg#	74
44) Trichloroethene	12.04	130	339120	107.69	ug/kg	97
45) 1,2-Dichloropropane	12.49	63	368729	129.15	ug/kg	88
46) Methyl Methacrylate	12.56	100	64854	123.98	ug/kg	82
47) 1,4-Dioxane	12.69	88	22097	2898.48	ug/kg	96
48) Bromodichloromethane	12.51	83	442698	113.83	ug/kg	100
49) Dibromomethane	12.42	93	186558	113.09	ug/kg	91
50) 4-Methyl-2-Pentanone	13.51	100	138807	548.13	ug/kg	78
51) 2-Chloroethyl vinyl ether	12.92	63	74708m	4904.42	ug/kg	
52) 2-Hexanone	14.21	43	769605	489.85	ug/kg	89
